

## About SPAES GmbH & Co. KG:

SPAES is a growing company in the field of aviation. As a specialist for technical solutions, SPAES offers products and services for aviation. This includes the design and certification of equipment, own products and systems as well as their integration and approval in aircrafts. The aviation products are designed, produced and certified according to European Technical Standard Order (ETSO).

As an EASA Part-21J Design Organization the company offers Supplement Type Certificate (STC), Minor Change and Minor Repair in the field of avionics, cabin interior, structure and electrical systems. SPAES develops installation KIT's for Minor Change and STC which are integrated in aircrafts by a maintenance organization Part-145. As the requirements for design and compliance verification engineers are increasing steadily in aviation, SPAES offers special trainings in the field of small and large helicopters (CS29/27) and small airplanes (CS23).

Joachim Schanz, Chief Executive Officer (CEO) of SPAES GmbH & Co. KG, founded the company in 2014 in Mannheim. Its Headquarter is situated at City Airport in Mannheim. A branch is located at Karlsruhe since 2018.
